

Circular Saw

MAM/MAC 75 TWIN

MAM/MAC 75 TWIN

exactcut
high performance circular saws

One saw Double performance

- Automatic machine for high output performance
- Possibility of simultaneous cutting of two bars
- Precise length of work-pieces
- On-line remote service management

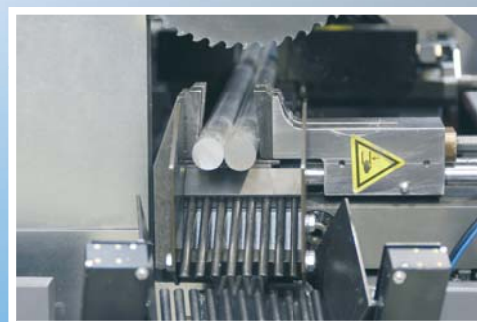

CUTTING RANGES

min	○○	2× ø15 mm	min	□□	2× 15×15 mm
max	○○	2× ø35 mm	max	□□	2× 30×30 mm
min	○	1× ø35 mm	min	□	1× 30×30 mm
max	○	1× ø70 mm	max	□	1× 60×60 mm

Cutting lengths: 10 - 200 mm standard

ExactCut MAM / MAC 75 TWIN circular saw is a new machine extending the series of circular automatic for high-performance mass cutting of bar material. Its design enables this saw to cut two bars simultaneously. By minimizing auxiliary process time and by optimizing the cutting process of the machine, it is possible to achieve the cycle speed from 0.5 second per piece. Output per hour reaches to 7,000 pieces.

The usage of this machine is especially convenient for the mass production: cutting of tubes and pipes, bars, profiles etc. made of steels and non-ferrous metals. If required, we are able to modify the machine, or fit it with accessories on the input and output.
